

Best Job or best Price?

If you are looking for the best price, simply get estimates and choose the cheapest contractor, but beware that if you have any issues whatsoever you may not find this contractor to make any repairs or the contractor may not honour the guarantee. This happens often.

For a quality Job Try to find a contractor:

- 1) From a referral
- 2) Has done work in your area.
- 3) Check references
- 4) Get 3-5 estimates
- 5) If one price is really low, three are in line and one is high, I would recommend selecting a contractor from the three that are in line.

This is where it is important to check the asphalt contracts references.

- 1) Do they have current insurance: Liability and WSIB
- 2) How long have they been in business. This proves that they have been around and will continue to support you.
- 3) Do they have an office and not a PO box. You need to be able to find them should there be an issue.
- 4) What is their guarantee
- 5) Compare the estimates and go with the Asphalt contractor you trust.
