

## Commercial Asphalt Paving Specifications

The minimum requirements for a heavy duty asphalt pavement are as follows

### Commercial Heavy Duty

- 1) 12" or 300 mm of granular 'B' base material compacted to 97% proctor
- 2) 6" or 150mm of Granular 'A' base material compacted to 97% Proctor
- 3) 2" or 50mm of HL8 asphalt
- 4) 2" or 50 mm of HL3 asphalt.
- 5) Laid in 2 coat

### High traffic areas with heavy loads

- 1) 18" or 300 mm of granular 'B' base material compacted to 97% proctor
- 2) 6" or 150mm of Granular 'A' base material compacted to 97% Proctor
- 3) 6" or 50mm of HL8 asphalt
- 4) 2" or 50 mm of HL3 asphalt.

Laid in 3 coat

Please note that the specifications can vary dramatically depending on your requirements, loads that will be applied to the pavement etc.

Please Understand your requirements, and design the pavement to suite them.
